

ELAS TEK ElasTek Products
by CCSi

The QC Hot Knife is a state-of-the-art, hand held, hot cutting tool!

This hot knife simplifies and eases the cutting of expanded polystyrene (EPS), extruded polystyrene (XEPS), polyethylene (PE), cross-linked polyethylene, polypropylene (PP), polyurethane (PU), foamed plastic, thermoplastic elastomers (TPE), and many other similar materials.

The QC Hot Knife eliminates the “snow shower” of foam beads, or crumbs, typically associated with other cutting tools, making clean and precise cuts.

It also features a unique patented “pulsing current” technology which heats the blade evenly and accurately, without overheating the handle.

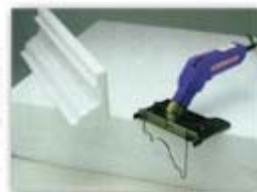

ElasTek™ Hot Knife: Features

- Heats to 600 F° (316 C°) in 5 seconds;
- Convenient 120 VAC, 1 Ampere, 130 Watt power;
- Ergonomic 2 inch “pistol grip” handle design;
- Compact 10.5 inch length;
- Light weight (2 lb.);
- Handle stays cool while cutting;
- Fast, clean cuts, leaves no bead dust or crumbs;
- Special alloy blades stay sharp and straight;
- Positive locking feature secures blade;
- 16 Point temperature control thumb switch;
- Trigger on-off switch;
- Patented “pulsing current” technology;
- 10 foot (3.1 m) non-twisting rubber cord;
- Parts are available individually;
- Available in a 'starter kit'. Scroll Guide
